

Group L

Name: Yinghao Qin      Student number:190189237

In this assignment, I did most of the coding part, like the implementation of the three heuristic methods, the combination of the MCTS algorithm and heuristics, and the modification of the recommendation policy for the best action. In addition, I wrote the implementation part of the report.

Finally, I have to say that I have learned a lot. My teammates and I have own strengths. For example, Jingye has leadership as well as organization ability, ChungHao is good at writing papers, and I seem to know more about programming knowledge. From the experience, I have to say that the teamwork really matters.
